

JD EDWARDS

USER MANAGEMENT TOOL

User Management Tool

What if...?

- You have a JD Edwards environment with multiple sites and hundreds of different users.
- There are several users, varying from invoicers to inventory managers and human resource employees.
- Managing these users can be a time-consuming task.
- There can be multiple system roles and row security (application rights) involved.

Quistor has developed a tool that helps you create, maintain and revoke users with the press of a button.

Tool Benefits

- One application with everything in reach in just one click.
- User creation now takes just 5 minutes instead of 15 minutes.
- Configuring or disabling a user can be done in an instant.
- Easily adaptable to any JD environment.
- No need to open multiple applications to create or configure a user.
- Compatible with Quistor's Password Reset Portal.
- Can be used by anyone with minimal training.
- Fast, easy installation and configuration.

Why User Management Tool?

The user management tool lets you create, modify and revoke users in an instant. It's adaptable to any JDE environment and can be used on the web as well as the windows JDE environment. With installation completed in a matter of days and a usable environment for anyone after this training, this will be the perfect tool for user management. This tool can be used from as web as from the standard Windows JDE environment.
